License information

The COMSOL Educational Discount Plan allows for the license to be used in academic research and teaching only. No contract work, commercial or government use is permitted.

- ¹ CPU (CPU-locked license): a single individual may use one concurrent session of the software on a single designated computer at any given time. CPU-locked licenses do not permit access to or use of the software over a network.
- ² NSL (Named Single User): one physical person designated to COMSOL by name can run the software. A Named Single User License does not permit access or use of the software over a network.
- ³ FNL (Floating Network License): price per concurrent user.
- ⁴ CKL (Class Kit License): for 30 students including up to two teachers for the teaching of a class.
- ⁵ Requires COMSOL Multiphysics. Module features can be found at www.comsol.com/products/specifications.
- ⁶ Requires the Structural Mechanics Module or the MEMS Module.
- ⁷ Requires the Structural Mechanics Module.
- ⁸ Requires the CFD Module.
- ⁹ Includes all of the CAD Import Module functionality.

For detailed license conditions, please refer to the COMSOL License Agreement at www.comsol.com/sla.

All licenses are perpetual, and support multicore/multiprocessor computers at no additional charge. The Floating Network License (FNL) supports cluster and cloud computing at no additional charge.

Subscription program

All updates and technical support are provided for the 12 months following the purchase. Further upgrades and technical support are available for the subsequent year at an annual cost of 20% of the then-current license price. Lapsed subscription renewals are subject to a restart fee of 15% of the then-current license price in addition to the subscription fee for the lapsed time and for the next 12 months.
